RE: TESTIMONIAL - MIND PROSPERITY, ALBERT WILLE

TO WHOM IT MAY CONCERN,

This is to confirm that the management team at Busamed Bram Fischer IA Private Hospital met with Mr Albert Wille in April 2025. And it has been a pleasure to have several interactions with him over a 2 week period.

Not only is Mr Wille extremely professional, the way in which he conducted the sessions and his manner of interacting with the different team members really added to the successful outcome. He was very well prepared for each session, obviously very knowledgeable with the contents and it was easy to relate to the different scenarios and examples he used. Mostly members of a management team attend these sessions with a level of doubt, but Mr Wille could easily breach that gap and guide us towards a few very enjoyable sessions that left us with the way forward and practical exercises to ensure that this is truly a worthwhile interaction.

I will recommend his services to corporates and small businesses, and even individuals who are serious about professional and personal growth and career development.

We are already planning our next sessions with Mind Prosperity in the near future, and we are comfortable that we will receive the same outstanding service.

Amanda van Rensburg
